

Exchange Worktable Sheet and Pipe Fiber Laser Cutting is Two machines in one, One laser source and a single cutting head for two complementary processes, each with performance equal to that of a dedicated system. Completely closed cutting area protect you from the risks of laser radiation. The gain in speed, accuracy and efficiency is maximum.

Guillotine shear is the type of plate shears widely selected by global purchasers because it can adjust the blade clearance and angle. When cutting plates with a thickness of more than 13mm, it has more advantages in terms of price and cutting effect.

1.The steel plate welded structure is used to eliminate stress through vibratory stress relief, and has good rigidity and stability

2.Adopt three point supporting rolling guide to eliminate the supporting clearance and improve the shearing quality

3.The blade gap is adjusted by hand wheel quickly, accurately and conveniently

4.The rectangular blade can be used with all four cutting edges and long service life

5.The shear Angle can be adjusted to reduce the distortion of the sheet

6.The upper tool rest adopts internal inclined structure to facilitate blanking and improve the accuracy of the workpiece

7.It has segmented shearing function

8.Motor back gauge, digital display

1.The steel plate welded structure is used to eliminate stress through vibratory stress relief, and has good rigidity and stability

2.Adopt three point supporting rolling guide to eliminate the supporting clearance and improve the shearing quality

3.The blade gap is adjusted by hand wheel quickly, accurately and conveniently

4.The rectangular blade can be used with all four cutting edges and long service life

5.The shear Angle can be adjusted to reduce the distortion of the sheet

6.The upper tool rest adopts internal inclined structure to facilitate blanking and improve the accuracy of the workpiece

7.It has segmented shearing function

8.Motor back gauge, digital display

1.Welding iron machine bed, high temperature aging treatment

2.Dual draive gantry tape

3.Aviation aluminum for beam and Z axis

4.High-precision rack, bilateral gear

5.Follow-up laser head

6.Universal supporting steel ball

7.Multiple limit protection, incuded hard origin
